

SONATA

Tiles SONATA designed for those who value stability and aesthetical look. Precise geometrical design professionally emphasise advantages of the roof perfectly integrating it into the general composition.

Why bitumen tiles by GARGŽDŲ MIDA?

- Minimal amount of waste and easy installation;
- Perfect noise absorption qualities;
- Wide range of colours and designs-- more than 20 colours in four different styles;
- Long life span – 20 to 25 years;
- Special treatment of mineral surfacing granules (pigment burned-in into the surface of granules) ensures long durability of the colour and high resistance of the tiles to weather conditions;
- Products comply with harmonized European standard EN 544;
- Quality management system ISO 9001 certificate and multi-level system of quality control of manufactured products;

1. Base - fibre glass
2. Bitumen layer
3. Upper layer - mineral surfacing

4. Bottom layer - adhesive polymer-modified bitumen
5. Bottom layer - easily removed silicon-based membrane
